PROJECTS:

FeedMyCuriosity: Rails, React.js, Flux | Full-Stack Developer

[live](#) • [github](#)

A site to store, organize, and read articles from feeds, inspired by Feedly

- Generates recent articles by fetching data from a feed url with the Feedjira gem
- Uses custom-built parsing methods to extract html content from feeds

BallerCoaster: Javascript, jQuery | Front-End Developer

[live](#) • [github](#)

A visual customizable theme park, complete with portals

- Uses object-oriented principles to generate interactive structures that users can freely create and manipulate
- Simulates projectile motion, gravity, and acceleration on an inclined slope using hand-rolled physics engine

Ruby On Tracks: Ruby, Rack Middleware | Back-End Developer

[github](#)

An MVC web server framework inspired by the functionality of Ruby on Rails

- Utilizes meta-programming to create corresponding controller and route methods
 - Built on a firm understanding of web request and response cycles, obtains cookie information, and writes JSON or HTML into the response
-

EDUCATION:

App Academy San Francisco CA, March - May 2016

Full Stack Web Development Course

- 1000-hour full-stack programming bootcamp with 3% acceptance rate
- Learned object-oriented programming, algorithms, MVC pattern, and programming best practices.
